

Mohammad Arsh Mukadam

JUNIOR PYTHON DEVELOPER

📍 **Maharashtra, India** | **+91 9403093340** | [E-mail](#) | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

Objective

Entry-level Python developer skilled in Python, Flask, and API development, aiming to contribute to real-world projects and learn industry practices.

Internship

I studio | Artificial Intelligence

2025

- Learned core AI and machine learning basics.
- Understood how APIs integrate AI into applications.
- Gained hands-on practice with NumPy fundamentals.
- Learned data handling and analysis using Pandas.

Projects

- Portfolio Website - Built using Python, Flask, HTML, CSS, and basic routing & templates.
- AI Virtual Assistant - Built using Python and integrated with Grok AI for intelligent query handling and dynamic responses.
- Weather API - Created using Python, requests module, and JSON API integration.
- ATM Simulator - Implemented with Python, focusing on OOP, file handling, and user-auth logic.
- Library Management System - Built using Python OOP, data structures, and file/database-style records.
- QR-Code Generator - Developed with Python and the qr code library for generating custom QR codes.

Education

Diploma in Electronics & Telecommunication from Government Polytechnic, Ratnagiri.

2025

Skills & Abilities

- Python
- Flask
- API Development
- HTML & CSS
- Git & GitHub
